Clinical Prediction Models A Practical Approach to Development, Validation, and Updating

How to Establish Clinical Prediction Models

Usefulness of prediction models. Prediction models can be useful for several purposes, such as for inclusion criteria or covariate adjustment in a randomized controlled trial 24,25,26. In observational studies, a prediction model may be used for confounder adjustment or case-mix adjustment in comparing outcome between centers 27. We concentrate on the usefulness of a prediction model for medical practice, including public health (e.g. screening for disease) and patient care (diagnosing ...
