There are tons of genres and formats (ePUB, PDF, etc.) to choose from accompanied with reader reviews and ratings.

### New Directions for Florida Post-Tensioned Bridges

In this opinion, an extradosed structure is a hybrid transition between a cable supported bridge and an internally prestressed structure. However, the initial aim of extradosed posttensioning ( Mathivat, 1989 ) was to provide larger eccentricity to the prestressing force, by elevating its slope, thus the cables rising outside of the concrete cross-section.
