Greensboro Florist - Flower Delivery by Plants and Answers ...

The answer will probably be 'no'. It was not the herbicide that changed, however. It was the genetic make-up of the plant population that changed. Some plants that he sprayed were resistant to the herbicide due to their unique genetic make-up (just as your genotype is unique to you).

BIOL 329 Evolution

The user is a predator. As the dots run around the screen, the user eats them by clicking on them with the mouse. After the user has eaten some of the dots, the survivors will reproduce. The population may or may not evolve, depending on the properties of the dots. EvoDots was the prototype for the Darwinian Snails lab in EvoBeaker.
