Sandifer has been studying Euler for decades and is one of the world's leading experts on his work. This volume is the second collection of Sandifer's How Euler Did It columns. Each is a jewel of historical and mathematical exposition.

How Euler Did It | Mathematical Association of America

Euler spends the rest of these two chapters doing applications of Bernoulli numbers, including calculating the Euler-Mascheroni constant, γ , to 15 decimal places. All this is rather unexpected in a textbook on differential calculus. With this, Euler did not write again on Bernoulli numbers until 1768. In fact, in the intervening
