1. Resources or the lack thereof. One of the most common differences between small and big organizations is the availability of resources. Naturally, small businesses tend to have limited resources, including a small HR team (usually one to three employees) and a restrictive budget, owing to their modest earnings.

### **Small Intestine vs Large Intestine - Difference Between**

The small intestine, which is directly connected to the stomach, is 3 to 5 m long end-to-end and is made up of the duodenum, jejunum and ileum. The inside wall of the small intestine is folded like the body of an accordion. This gives it a very large surface area and food can make contact with a large number of intestinal cells.

### **The Small and Large Intestines | Anatomy and Physiology II**

Velvety tissue lines the small intestine, which is divided into the duodenum, jejunum, and ileum. The large intestine (colon or large bowel) is about 5 feet long and about 3 inches in diameter. The colon absorbs water from wastes, creating stool. As stool enters the rectum, nerves there create the urge to defecate.
